

I am a XM Satellite Radio Subscriber. I since the XM Service is a paid service, I do not feel like the NAB should limit the wide variety of programming that XM offers. I have been very impressed with XM and its huge selection of programming. No local FM radio station can come close to the type of content that XM offers. I subscribed to XM for that reason. I believe since this is a paid service I should be able to listen to what I want to listen to. Please do not interfere with the amazing technology that XM is offering.
